Changes in Project Officials must be submitted in writing from the CEO.

6.0 ATTACHMENTS/COMPLETENESS REVIEW:

Confirm in the blocks [] below that each item listed is attached.

- [X] A certified copy of the legislation by the governing body of the applicant authorizing a designated official to sign and submit this application and execute contracts. This individual should sign under 7.0, Applicant Certification, below.
- A certification signed by the applicant's chief financial officer stating all local share funds required for the project will be available on or before the dates listed in the Project Schedule section. If the application involves a request for loan (RLP or SCIP), a certification signed by the CFO which identifies a specific revenue source for repaying the loan also must be attached. Both certifications can be accomplished in the same letter.
- [X] A registered professional engineer's detailed cost estimate and useful life statement, as required in 164-1-13, 164-1-14, and 164-1-16 of the Ohio Administrative Code. Estimates shall contain an engineer's original seal or stamp and signature.
- INA A cooperation agreement (if the project involves more than one subdivision or district) which identifies the fiscal and administrative responsibilities of each participant.
- Projects which include new and expansion components and potentially affect productive NA farmland should include a statement evaluating the potential impact. If there is a potential impact, the Governor's Executive Order 98-VII and the OPWC Farmland Preservation Review Advisory apply.
- [X]Capital Improvements Report: (Required by O.R.C. Chapter 164.06 on standard form)
- Supporting Documentation: Materials such as additional project description, photographs, economic impact (temporary and/or full time jobs likely to be created as a result of the project), accident reports, impact on school zones, and other information to assist your district committee in ranking your project. Be sure to include supplements which may be required by your local District Public Works Integrating Committee.

7.0 APPLICANT CERTIFICATION:

The undersigned certifies that: (1) he/she is legally authorized to request and accept financial assistance from the Ohio Public Works Commission; (2) to the best of his/her knowledge and belief, all representations that are part of this application are true and correct; (3) all official documents and commitments of the applicant that are part of this application have been duly authorized by the governing body of the applicant; and, (4) should the requested financial assistance be provided, that in the execution of this project, the applicant will comply with all assurances required by Ohio Law, including those involving Buy Ohio and prevailing wages.

Applicant certifies that physical construction on the project as defined in the application has NOT begun, and will not begin until a Project Agreement on this project has been executed with the Ohio Public Works Commission. Action to the contrary will result in termination of the agreement and withdrawal of Ohio Public Works Commission funding of the project.

STATUS OF FUNDS CERTIFICATION

The City of North College Hill will utilize \$140,000 from its Street Levy Fund as its participation for the Cordova Avenue Improvements project.

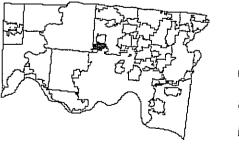

Nicholas Link

North College Hill Auditor

North College Hill Hamilton County, Ohio

Hamilton County Regional Planning Commission / 9-96

CITY OF NCH

Requested by Streets & Highways Committee

RESOLUTION 10-2005

AUTHORIZING FILING OF APPLICATION FOR 2006 STATE CAPITAL IMPROVEMENT PROGRAM (S.C.I.P.) FUNDS AND EXECUTION OF PROJECT AGREEMENT WITH OHIO PUBLIC WORKS COMMISSION AND DECLARING AN EMERGENCY

BE IT RESOLVED, by the Council of the City of North College Hill, State of Obio, two-thirds of the members elected thereto concurring:

Section 1.

The City Council of the City of North College Hill hereby approves the filing of an application for 2006 S.C.I.P. Funds to the District Public Works Integrating Committee.

Section 2.

This resolution is declared an emergency measure necessary for the immediate preservation of the public peace, health, and safety. The reason for the emergency is that immediate adoption of this resolution is necessary to ensure that prompt and timely applications are submitted for state funding of the City's proposed capital improvement projects. This resolution shall take effect and be in force upon its passage by Council and approval by the Mayor.

| Passed this day of | 2005. |

| | Mayor |

ADDITIONAL SUPPORT INFORMATION

For Program Year 2006 (July 1, 2006 through June 30, 2007), jurisdictions shall provide the following support information to help determine which projects will be funded. Information on this form must be accurate, and where called for, based on sound engineering principles. Documentation to substantiate the individual items, as noted, is required. The applicant should also use the rating system and its' addendum as a guide. The examples listed in this addendum are not a complete list, but only a small sampling of situations that may be relevant to a given project.

IF YOU ARE APPLYING FOR A GRANT, WILL YOU BE WILLING TO ACCEPT A LOAN IF ASKED BY THE DISTRICT? _____YES _X__NO (ANSWER REQUIRED)

Note: Answering "Yes" will not increase your score and answering "NO" will not decrease your score.

1) What is the physical condition of the existing infrastructure that is to be replaced or repaired?

Give a statement of the nature of the deficient conditions of the present facility exclusive of capacity, serviceability, health and/or safety issues. If known, give the approximate age of the infrastructure to be replaced, repaired, or expanded. Use documentation (if possible) to support your statement. Documentation may include (but is not limited to): ODOT BR86 reports, pavement management condition reports, televised underground system reports, age inventory reports, maintenance records, etc., and will only be considered if included in the original application. Examples of deficiencies include: structural condition; substandard design elements such as widths, grades, curves, sight distances, drainage structures, etc.

The existing pavement is 50 years old and the surface is 30 years old. Potholes, base failures, deteriorated curb are numerous throughout the entire length of this project. The storm sewers are inadequate and have failed. The condition of the existing pavement is such that the entire pavement needs to be reconstructed. The pavement is so deteriorated that water ponds and freezes in the winter time causing hazardous conditions.

2) How important is the project to the safety of the Public and the citizens of the District and/or service area?

Give a statement of the projects effect on the safety of the service area. The design of the project is intended to reduce existing accident rate, promote safer conditions, and reduce the danger of risk, liability or injury. (Typical examples may include the effects of the completed project on accident rates, emergency response time, fire protection, and highway capacity.) Please be specific and provide documentation if necessary to substantiate the data. The applicant must demonstrate the type of problems that exist, the frequency and severity of the problems and the method of correction.

This project is very important to the safety of the public who travel this road as evidenced by the attached pictures. By adding storm sewers and catch basins, we will eliminate the ponding that is occurring on the street thus eliminating a traffic hazard.

3) How important is the project to the health of the Public and the citizens of the District and/or service area?

Give a statement of the projects effect on the health of the service area. The design of the project will

improve the overall condition of the facility so as to reduce or eliminate potential for disease, or correct concerns regarding the environmental health of the area. (Typical examples may include the effects of the completed project by improving or adding storm drainage or sanitary facilities, replacing lead jointed water lines, etc.). Please be specific and provide documentation if necessary to substantiate the data. The applicant must demonstrate the type of problems that exist, the frequency and severity of the problems and the method of correction.

The addition of new storm sewers and reconstruction of the pavement and curbs will convey water away from the homes and eliminate flooding in the basements.

4) Does the project help meet the infrastructure repair and replacement needs of the applying jurisdiction?

The jurisdiction must submit a listing in priority order of the projects for which it is applying. Points will be awarded on the basis of most to least importance.

| Priority 1 | Foxwood Drive Improvements |
|---------------------|--|
| Priority 2 | Catalpa Avenue Phase II Improvements |
| Priority 3 | Cordova Avenue Improvements |
| Priority 4 | |
| Priority 5 | |
| | ent will the user fee funded agency be participating un the funding of the project? e: rates for water or sewer, frontage assessments, etc.) |

| | |
| | |
| 6) Economic G | owth – How will the completed project enhance economic growth |
| Give a statement of | f the projects effect on the economic growth of the service area (be specific). |
| | N/A |
| | |
| | |
| | |
| 7) Matching Fu | nds - <u>LOCAL</u> |

The information regarding local matching funds is to be filed by the applicant in Section 1.2 (b) of the Ohio Public Works Association's "Application For Financial Assistance" form.

8) Matching Funds - OTHER

The information regarding local matching funds is to be filed by the applicant in Section 1.2 (c) of the Ohio Public Works Association's "Application For Financial Assistance" form. If MRF funds are being used for matching funds, the MRF application must have been filed by August 31st of this year for this project with the Hamilton County Engineer's Office. List below all "other" funding the source(s).

Local funding will be utilized for matching funds for this project.

| RATING TEAM: 5 | |

General Statement for Rating Criteria

Points awarded for all items will be based on engineering experience, field verification, application information and other information supplied by the applicant, which is deemed to be relevant by the Support Staff. The examples listed in this addendum are not a complete list, but only a small sampling of situations that may be relevant to a given project.

Appeal Score

CIRCLE THE APPROPRIATE RATING

What is the physical condition of the existing infrastructure that is to be replaced or repaired? 1)

| (25) | Failed |
|------|----------|
| 23 - | Critical |

20 - Very Poor

17 - Poor

15 - Moderately Poor

10 - Moderately Fair

5 - Fair Condition

0 - Good or Better

Criterion 1 - Condition

Condition of the particular infrastructure to be repaired, reconstructed or replaced shall be a measure of the degree of reduction in condition from its original state. Capacity, serviceability, safety and health shall not be considered in this criterion. Any documentation the Applicant wishes to be considered must be included in the application package.

Definitions:

Failed Condition -requires complete reconstruction where no part of the existing facility is salvageable. (E.g. Roads: complete reconstruction of roadway, curbs and base; Bridges: complete removal and replacement of bridge; Underground: removal and replacement of an underground drainage or water system.

Critical Condition - requires partial reconstruction to maintain integrity. (E.g. Roads: reconstruction of roadway/curbs can be saved; Bridges: removal and replacement of bridge with abutment modification; Underground: removal and replacement of part of an underground drainage or water system.

Very Poor Condition - requires extensive rehabilitation to maintain integrity. (E.g. Roads: extensive full depth, partial depth and curb repair of a roadway with a structural overlay; Bridges: superstructure replacement; Underground: repair of joints and/or replacement of pipe sections.

Poor Condition - requires standard rehabilitation to maintain integrity. (E.g. Roads: moderate full depth, partial depth and curb repair to a roadway with no structural overlay needed or structural overlay with minor repairs to a roadway needed; Bridges: extensive patching of substructure and replacement of deck; Underground: insituform or other in ground repairs.

Moderately Poor Condition - requires minor rehabilitation to maintain integrity. (E.g. Roads: minor full depth, partial depth or curb repairs to a roadway with either a thin overlay or no overlay needed; Bridges: major structural patching and/or major deck repair.

Moderately Fair Condition - requires extensive maintenance to maintain integrity. (E.g. Roads: thin or no overlay with extensive crack sealing, minor partial depth and/or slurry or rejuvenation; Bridges: minor structural patching, deck repair, erosion control.)

Fair Condition - requires routine maintenance to maintain integrity. (E.g. Roads: slurry seal, rejuvenation or routine crack sealing to the roadway; Bridges: minor structural patching.)

Good or Better Condition - little to no maintenance required to maintain integrity.

Note: If the infrastructure is in "good" or better condition, it will NOT be considered for SCIP/LTIP funding unless it is an expansion project that will improve serviceability.

How would improved sanitary sewers | | | |
| | <i>Note:</i> Each project is looked at on an individual basis to determine if any aspects of are NOT intended to be exclusive. | f this category apply. Examples given above | | | |
| 4) | Does the project help meet the infrastructure repair and replacement needs of the Note: Jurisdiction's priority listing (part of the Additional Support Information) must be | e applying jurisdiction? filed with application(s). | | | |
| | 25 - First priority project 20 - Second priority project 15 - Third priority project 10 - Fourth priority project 5 - Fifth priority project or lower | Appeal Score | | | |
| | Criterion 4 – Jurisdiction's Priority Listing The jurisdiction <u>must</u> submit a listing in priority order of the projects for which it is a most to least importance. The form is included in the Additional Support Information | pplying. Points will be awarded on the basis of | | | |

| To what extent will a user fee funded agency be participating in t | he funding of the project? |
|--|----------------------------|
| (10)- Less than 10% | 3 1 3 |
| 9–10% to 19.99% | |
| 8 – 20% to 29.99% | Appeal Score |
| 7 – 30% to 39.99% | ** |
| 6 – 40% to 49.99% | |
| 5 – 50% to 59.99% | |
| 4 – 60% to 69.99% | |
| 3 – 70% to 79.99% | |
| 2 – 80% to 89.99% | |
| 1 – 90% to 95% | |
| 0 – Above 95% | |

Criterion 5 - User Fee-funded Agency Participation

To what extent will a user fee funded agency be participating in the funding of the project? (Example: rates for water or sewer, frontage assessments, etc.). The applying jurisdiction must submit documentation.

6) Economic Growth - How the completed project will enhance economic growth (See definitions).

| 10 - The project will <u>directly</u> secure new employment | Appeal Score |
|---|--------------|
| 5 – The project will permit more development | |
| ①- The project will not impact development | |
| | |

Criterion 6 - Economic Growth

Will the completed project enhance economic growth and/or development in the service area?

Definitions:

Secure new employment: The project as designed will secure development/employers, which will immediately add new permanent employees to the jurisdiction. The applying agency must submit details.

Permit more development: The project as designed will permit additional business development/employment. The applicant must supply details.

The project will not impact development: The project will have no impact on business development.

Note: Each project is looked at on an individual basis to determine if any aspects of this category apply.

7) Matching Funds - LOCAL

- 10 This project is a loan or credit enhancement
- 10-50% or higher
- 8 40% to 49.99%

List total percentage of "Local" funds 20 %

- 6-30% to 39.99%
- 4-20% to 29.99%
- 2 10% to 19.99%
- 0 Less than 10%

Criterion 7 - Matching Funds - Local

The percentage of matching funds which come directly from the budget of the applying agency. Ten points shall be awarded if a loan request is at least 50% of the total project cost. (If the applying agency is not a user fee funded agency, any funds to be provided by a user fee generating agency will be considered "Matching Funds – Other")

| Matching Funds - OTHER | List total percentage of "Other" funds% |
|---|---|
| 10 – 50% or higher 8 – 40% to 49.99% | List below each funding source and percentage |
| 6 – 30% to 39.99% | % |
| 4 – 20% to 29.99% | % |
| 2 – 10% to 19.99% | % |
| 1 – 1% to 9.99% | % |
| (0)- Less than 1% | |

Criterion 8 - Matching Funds - Other

The percentage of matching funds that come from funding sources other than those mentioned in Criterion 7. A letter from the outside funding agency stating their financial participation in the project and the amount of funding is required to receive points. For MRF, a copy of the current application form filed with the Hamilton County Engineer's Office meets the requirement.

Appeal Score

9) Will the project alleviate serious capacity problems or hazards or respond to the future level of service needs of the district? (See Addendum for definitions)

| 10 - | Project | design | is i | for | future | demand. |
|------|---------|--------|------|-----|--------|---------|
|------|---------|--------|------|-----|--------|---------|

- 8 Project design is for partial future demand.
- 6 Project design is for current demand.
- 4 Project design is for minimal increase in capacity.
- (2) Project design is for no increase in capacity.

Criterion 9 - Alleviate Capacity Problems

The jurisdiction shall provide a narrative, along with pertinent support documentation, which describe the existing deficiencies and showing how congestion will be reduced or eliminated and how service will be improved to meet the needs of any expected growth or development. A formal capacity analysis accompanying the application would be beneficial. Projected traffic or demand should be calculated as follows:

Formula:

8)

Existing users x design year factor = projected users

| Design Year | Design year factor | | | |
|-------------|--------------------|----------|-------|--|
| | <u>Urban</u> | Suburban | Rural | |
| 20 | 1.40 | 1.70 | 1.60 | |
| 10 | 1.20 | 1.35 | 1.30 | |

Definitions:

<u>Future demand</u> – Project will eliminate existing congestion or deficiencies and will provide sufficient capacity or service for twenty-year projected demand or fully developed area conditions. Justification must be supplied if the area is already largely developed or undevelopable and thus the projection factors used deviate from the above table.

<u>Partial future demand</u> – Project will eliminate existing congestion or deficiencies and will provide sufficient capacity or service for ten-year projected demand or partially developed area conditions. Justification must be supplied if the area is already largely developed or undevelopable and thus the projection factors used deviate from the above table.

<u>Current demand</u> – Project will eliminate existing congestion or deficiencies and will provide sufficient capacity or service only for existing demand and conditions.

Minimal increase – Project will reduce but not eliminate existing congestion or deficiencies and will provide a minimal but less than sufficient increase in existing capacity or service for existing demand and conditions.

No increase – Project will have no effect on existing congestion or deficiencies and provide no increase in capacity or service for existing demand and conditions.

- 10) Readiness to Proceed If SCIP/LTIP funds are granted, when would the construction contract be awarded? (See Addendum concerning delinquent projects and readiness to proceed)
 - (5) Will be under contract by December 31, 2006 and no delinquent projects in Rounds 17 & 18
 - 3 Will be under contract by March 31, 2007 and/or one delinquent project in Rounds 17 & 18
 - 0 Will not be under contract by March 31, 2007 and/or more than one delinquent project in Rounds 17 & 18

Criterion 10 - Readiness to Proceed

The Support Staff will assign points based on engineering experience and status of design plans. A project is considered delinquent when it has not received a notice to proceed within the time stated on the original application and no time extension has been granted by the OPWC. A jurisdiction receiving approval for a project and subsequently canceling the same after the bid date on the application will receive zero (0) points under this round and the following round, unless a variance is approved by the Integrating Committee.

Appeal Score

- Does the infrastructure have regional impact? Consider origination and destination of traffic, functional classifications, size of service area, and number of jurisdictions served, etc. (See Addendum for definitions)
 - 10 Major Impact

8 - Significant Impact

6 - Moderate Impact

4 - Minor Impact

(2) Minimal or No Impact

Criterion 11 - Regional Impact

The regional significance of the infrastructure that is being repaired or replaced.

Definitions:

Major Impact – Roads: Major Arterial: A direct connector to an Interstate Highway; Arterials are intended to provide a greater degree of mobility rather than land access. Arterials generally convey large traffic volumes for distances greater than one mile. A major arterial is a highway that is of regional importance and is intended to serve beyond the county. It may connect urban centers with one another and/or with outlying communities and employment or shopping centers. A major arterial is intended primarily to serve through traffic.

Significant Impact – Roads: Minor Arterial: A roadway, also serving through traffic, that is similar in function to a major arterial, but operates with lower traffic volumes, serves trips of shorter distances (but still greater than one mile), and may provide a higher degree of property access than do major arterials.

Moderate Impact – Roads: Major Collector: A roadway that provides for traffic movement between local roads/streets and arterials or community-wide activity centers and carries moderate traffic volumes over moderate distances (generally less than one mile). Major collectors may also provide direct access to abutting properties, such as regional shopping centers, large industrial parks, major subdivisions and community-wide recreational facilities, but typically not individual residences. Most major collectors are also county roads and are therefore through streets.

Minor Impact – Roads: Minor Collector: A roadway similar in functions to a major collector but which carries lower traffic volumes over shorter distances and has a higher degree of property access. Minor collectors may serve as main circulation streets within large, residential neighborhoods. Most minor collectors are also township roads and streets and may, or may not, be through streets.

Minimal or No Impact - Roads: Local: A roadway that is primarily intended to provide access to abutting properties. It tends to accommodate lower traffic volumes, serves short trips (generally within neighborhoods), and provides connections preferably only to collector streets rather than arterials.

| 12) | What is the overall economic health of the jurisdiction? | | | | |
|----------|--|---|--|--|--|
| | 10 Points 8 Points | | | | |
| | 6 Points | | | | |
| | 4 Points | | | | |
| | 2 Points | | | | |
| | Criterion 12 – Economic Health The District 2 Integrating Committee predetermines the jurisdiction's economic health. The econ periodically be adjusted when census and other budgetary data are updated. | omic health of a jurisdiction may | | | |
| 13) | Has any formal action by a federal, state, or local government agency resulted in a partial or complete ban of the usage or expansion of the usage for the involved infrastructure? | | | | |
| | 10 - Complete ban, facility closed | | | | |
| | 8 – 80% reduction in legal load or 4-wheeled vehicles only | Appeal Score | | | |
| | 7 – Moratorium on future development, not functioning for current demand | | | | |
| | 6 - 60% reduction in legal load | | | | |
| | 5 - Moratorium on future development, functioning for current demand | | | | |
| | 4 – 40% reduction in legal load | | | | |
| | 2 – 20% reduction in legal load | | | | |
| | (0) Less than 20% reduction in legal load | | | | |
| | Criterion 13 - Ban The jurisdiction shall provide documentation to show that a facility ban or moratorium has been moratorium must have been caused by a structural or operational problem. Points will only be a project will cause the ban to be lifted. | formally placed. The ban or warded if the end result of the | | | |
| 14) | What is the total number of existing daily users that will benefit as a result of the proposed p | roject? | | | |
| | 10 - 16,000 or more | Appeal Score | | | |
| | 8 - 12,000 to 15,999 | Appear Score | | | |
